

Microinjection mold

Printing stringency: Low

Our condition

- Layer height: 0.1
- Infill: 20%
- Support: Yes
- 200°C, with PLA

Features

- One-print
- A built-in level for mold removal from agar
- Two models:
 - **Regular:** More space in the lever chamber for easier lever handling
 - **Minimal support:** With a slope design to minimize the needed printing support
- Thicken body to prevent warping with heat over time
- Expanded wing to keep the mold float
